

## General

- Source Sans Pro (Google Fonts) for sans-serif
- Lighter-weight Serif for all headers
- Sticky nav bar
- "Freddie Mercury" on top of nav bar rather than next to page title
- Serif looks better in all caps
- Make all images duotone - same scheme as landing page image
- Columns for content - Image fixed on right, text on left
- Bigger margins on the side
- Citations/references on the bottom
- Nav bar red bg + white type; box on hover + invert colors

## Landing page

- Remove glow, filled red box + white type upon hover
  - Image bigger, end to end
    - Variety of ways to do that
      - Set image to background image and create white bg for buttons div + Freddie Mercury text

## Legacy

- Image above text for consistency
